

MTD TIRE & WHEEL ASSEMBLY COMPLETE CODES

All codes are used in the following manner...

- A) codes immediately follow a base tire or wheel assy part number
- B) codes use a dash to separate from the base part number
- C) codes are 4 digits in length and begin with -09

WHEEL ASSY COMPLETE - this code is placed in the 3rd position of the 4 digit code

CODE	=	PAINT COLOR
0	=	Null
1	=	Oyster Gray
2	=	<i>Not Used</i>
3	=	Cub Beige
4	=	Radiant Yellow
5	=	Yellow Jacket

TIRES ONLY - this code is placed in the 4th position of the 4 digit code

CODE	=	VENDOR
0	=	Null
1	=	Carlisle
2	=	Dico
3	=	<i>Not Used</i>
4	=	Cheng
5	=	Duro
6	=	Kenda

NOTE: When ordering a rim only, the above code is not used. Only the MTD paint code is required when ordering a base rim (without tire) number.

Example: If code is -09**02**, Then the part number is simply a Dico tire

Example: If code is -09**31**, Then the wheel assembly complete uses a Carlisle tire and a rim that is painted Cub Beige
